URIMAT

MB ActiveCleaning with Kalkex

with microbiological and odour eradicating action. Removes lime and soap residues and delays renewed soiling

Product efficiency:

The URIMAT MB-ActiveCleaner with Kalkex has a microbiological action. It features excellent cleaning power and removes bad odours as a result of the decomposition of organic substances. **It removes lime and soap residues and delays renewed soiling.** It is particularly suitable for maintenance cleaning and odour removal in heavily used sanitary facilities.

Properties:

Microorganisms deeply penetrate the pores, breaking down the odorous organic residues deposited there. URIMAT MB-ActiveCleaner with Kalkex provides sustained, comfortable freshness. Its daily use prevents bad odours from developing.

Ingredients pursuant to EU recommendations:

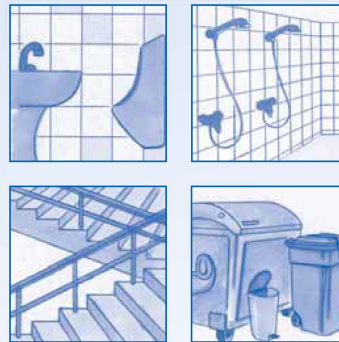

Anionic tensides: <5 %, nonionic tensides: <5 %, preservatives. Other ingredients: additives and flavours.

When cleaning sanitary facilities, do not use any cleaning agents containing chlorine and acid in addition to URIMAT MB-ActiveCleaner with Kalkex.

Humans and the environment

- Tensides are biodegradable (according to the OECD test method)
- Phosphate-, formaldehyde- and solvent-free
- Dermocompatible
- The bottle is made of polyethylene, the cover of polypropylene: recyclable
- UBA 01060064

Range of applications:

- Toilet facilities
- Sanitary facilities
- Lavatories
- Showers
- Facades
- Passages
- Stairwells
- Dumpsters
- Waste collection stations
- Floors
